ONE-YEAR GUARANTEE

(3-year the same except for period covered)

The FRANKLIN FORESTRY COMPANY hereby makes the following guaranty with the party of the second part named in the above contract, to which this guarantee is attached and of which it becomes a part:

If after three months and within one year from the completion of the planting work prescribed by said contract, written notice from said party of the second part or his legal representatives shall be received at the principal business office of said Company, to the effect that less than 75% of the trees planted under said contract are then alive, then said FRANKLIN FORESTRY COMPANY shall, at its own expense, make an examination of such planting or plantings, and if, in its judgment, the condition so reported exists, the Company shall, within a period of 18 months from the completion of the said planting, plant a sufficient number of trees (of the same variety and age as the original planting, if possible) to bring the total number of living trees up to at least 75% of the original setting; this work to be done at no expense whatever to the party of the second part.

It is hereby expressly understood and agreed that this guaranty *shall not* apply in case of loss due to fire; nor in case of loss due to convulsions of nature such as landslips, floods, cyclones, or hail storms; nor in case of loss due to any appearance, development, or increase of insect enemies or fungous diseases, except when such insects or fungi were plainly present on the stock when it was originally planted; nor shall it apply in case of loss or damage caused by third parties, whether man or beast, nor in case of loss or damage due to the acts or omissions of the party of the second part, his agent or agents.

But that it *shall* apply only in case of losses caused by unfavorable and extreme climatic conditions, such as heat, cold, drought, or early or late frosts.

The Company further guarantees that no weak or inferior stock shall be used in any planting, and that the trees at the time of setting shall be free from injurious insects or diseases. All stock set by the Company bears the certificate of the State Nursery Inspector.

FRANKLIN FORESTRY COMPANY

by

CONTRACT PLANTING

This Company makes a specialty of contract forest planting, furnishing both trees and labor.

Guarantee

For those who desire, we protect our plantations by either a one-year or a three-year guarantee like that printed on the opposite page.

Over three-quarters of our customers have availed themselves of this guarantee, which is in reality a form of insurance.

25% Discount Applying to Three-Year Contracts

This feature, instituted by us three years ago, with the advantage of so substantial a saving in cost, now comprises a large portion of our business.

Details appear on pages 4 and 5.

Time to Plant and Stock to Use

Forest planting may be done at any time when there is no frost in the ground with the exception of the summer months, when the new growth is too tender to bear shipment.

Any of the sizes listed on pages 4 and 5 will give good results if used on the location best suited to it—a matter that can be best determined by personal examination of the ground. Three-year transplants are probably best for average conditions, but sometimes on unusually favorable ground three-year seedlings can be used, while in long grass a four-year transplant is required.

Early Orders Desirable

Owing to the fact that all planting work must be planned a good bit in advance, customers are urged to enter their orders before the planting season commences, or at the latest by April 1st, in order to lessen the inevitable rush due to the seasonal character of our work.

Prices

Planting prices have been kept at the lowest figure consistent with proper work and are given in full on pages 4 and 5 of this catalogue. Nursery stock prices on page 6 and 7.

CONTRACT PLANTING PRICES 1926

(The prices given on these pages include both stock and planting)

Land will be set with the following-named species at the rate of approximately 1000 plants to the acre, spaced about 6½ feet apart each way. Other spacings at increased rates.

No parcel less than five acres in area accepted at these prices.

Trees will be set by the thousand unless it is specifically desired to set by the acre, in which case accurate estimate of area must be furnished; if not furnished, land will be surveyed by us at a nominal charge. If set by the thousand, survey is not necessary.

To owners willing to make contracts covering a period of three years, we will allow a DISCOUNT of 25% from these prices, because of the advantage to us of being able to plan our nursery stock requirements ahead. The total amount of stock planted under such contracts must be at least 30,000 trees; and the question of whether a given year's planting is to be done in spring or fall must be left at our option, with due regard for the owner's preference.

3-year WHITE PINE, SCOTCH PINE, AUSTRIAN PINE OR NORWAY SPRUCE TRANSPLANTS

GUARANTEED FOR ONE YEAR	GUARANTEED FOR THREE YEARS

Japanese Larch	(<i>Larix leptolepis</i>)			
Transplants	(4 to 5 ft.)	1.50 each	
Transplants	(5 to 7 ft.)	2.00 each	

We have larger sizes and various species other than those listed which we will gladly quote on application.

Reduction on orders for 100 and up, in the larger sizes. Note conditions on outside back cover.

In the case of all sizes larger than two feet we reserve the right to decline any order for a quantity too small to make shipment profitable.

It is sometimes advisable with sizes three feet and up to take the roots up with a ball of earth and tie with burlap. For this a charge of 20c. per tree will be made. (Ball and Burlap free in carload lots of larger sizes)

SPECIAL STOCK FOR SALE SPRING 1926

25,000	4-year Scotch Pine seedlings	8 to 12 in.	
			@ \$12.00 per M

Young forest plantation

The Same plantation 12 years later

Section of a 500 acre plantation

50 year old White Pine, Plymouth County, Mass.

WOODS WORK

Under this head we handle the following kinds of work:

Estimating, Surveying and Mapping

We make timber estimates with the degree of accuracy wanted, depending chiefly on the quality of timber and the time the owner wishes to spend. When desired the area will be surveyed and mapped and the whole combined to form an accurate working plan for the owner's guidance in operating.

Forest Thinning and Brush Cutting Cordwood Cutting

The importance of thinning and firelines as a means of improving and protecting forest growth continues to be more and more recognized. Besides the resulting benefit to the stand a profit can often be realized from the cordwood which in many cases is obtained from the operation.

We are also prepared to trim out the brush in young plantations. This is done either by partial or complete lopping around planted trees that are being interfered with, and the cost in many cases is only a few dollars per acre.

Our charge for all woods work of this sort varies with conditions and will be given on application.

Weevil Removal

The insect known as the White Pine Weevil, while seldom fatal to the tree, sometimes causes injury to young plantations by destroying some of the leading shoots. It is best controlled by cutting and burning the infested tips in late spring or early summer.

Basis of charge similar to preceding paragraph.

Prices on nursery stock given on pages 6 and 7 are net, F. O. B. cars, nurseries, and are subject to no discounts, whatsoever. Packing is included in the case of 2, 3 and 4-year old stock; added at cost in other cases.

All stock is listed subject to previous sale.

While we do not guarantee our stock when not planted by us, we use every effort to satisfy and please our customers, and if notified within 5 days of any unsatisfactory shipment received from our nurseries we will either make it right or take the stock back.
